FOLDER OPERATION SWITCH ENGINEERING DIVISION

13 November 1959

TO: Resident Manager

FROM: Special Administrative Assistant

SUBJECT: OPERATION SWITCH - RELOCATION  
OF OFFICES

The scheduled dates for the movement of various offices to Site Fred, as established herein, supplement my memorandum of 26 September covering this same subject. These dates are based on present ship schedules and the assumption that there will be no stevedoring activities at the deep-water pier during the period outlined. Should this situation change the prescribed dates will be altered accordingly.

The movement of all offices will be under the direction and coordination of the General Supervisor - Supply and any changes to the established schedules or the equipment and furniture lists, previously collected by the Supply Division, will be brought to his attention prior to the actual moving date.

In general, all moves will be made during the early morning working hours. The Supply Division will provide each office adequate quantities of shipping tags and cardboard cartons for packing and identification purposes. Personal items will be moved by the individual owner. Shipping tags, or other identification markings, are to show 1) division or department office and 2) the applicable building number on Site Fred.
